

County Level Permanency and Safety Data

CFSR PROCESS

Approximately every three years, the Administration of Children and Families (ACF) Children's Bureau assesses each state's conformity with Titles IV-B and IV-E of the Social Security Act via the Child and Family Services Review (CFSR). The CFSR measures each state's performance in the areas of safety, permanency and placement stability using a set of pre-defined measures. State performance on each measure is compared to a national standard set by the Children's Bureau.

In May 2015, ACF published the final measures (sometimes referred to as metrics or data indicators) and the national performance standards that the Children's Bureau will use to assess conformity during Round 3. These performance standards were calculated using data from all states on children served between 2011 and 2013 and will remain constant throughout the third round of the CFSR. States performing worse than the national standard at the time of their CFSR review will be required to develop a Performance Improvement Plan (PIP) and will be subject to on-going monitoring from ACF. New York State is set to have its third CFSR during 2016.

To help state's track their CFSR performance, ACF has announced that it will release updated, state-level performance metrics every six months. To date, these releases have covered two time periods (see below) which OCFS has labelled Waves 1 & 2.

- Wave 1 – FFY 2013 (October 1, 2012 – September 30, 2013)
- Wave 2 – FFY 2014 (October 1, 2013 – September 30, 2014)

CURRENT PACKET

To help NYS better understand its CFSR performance, this packet provides county-level breakouts of the six CFSR metrics on which New York State was performing below national standards as of May 2015. As the data released by ACF is limited to the state level, these metrics were produced by the OCFS Bureau of Research, Evaluation and Performance Analytics (BREPA) using syntax provided by ACF. This packet replaces and updates the county-level permanency data distributed in February 2015 by OCFS, as those packets were created prior to the release of the ACF syntax.

The packet contains two summary tables, one for each of the two Waves described above. Providing the county-level snapshots for multiple waves of data (e.g., Wave 1 and Wave 2) will allow counties to track their performance on each measure over time and identify any areas needing improvement and areas in which the county performance is strong compared to New York State performance or national standards. It is OCFS' intention to provide updated county-level breaks every six months, in keeping with the ACF release schedule.

CFSR PERMANENCY AND SAFETY MEASURES

Each of the six metrics included in the summary tables are described in more detail below and the sample/timeframe used to measure each metric for both waves appears in the summary table.

PERMANENCY INDICATORS

Permanency Indicator 1 (P1): Permanency in 12 months for children entering foster care: Of all children who enter foster care in a 12 month period, what percent are discharged to permanency¹ within 12 months of entering foster care? This figure takes all children who entered care during a one year period (denominator) and then of those children, how many were discharged to permanency within one year of entry and before turning 18 (numerator). A higher percentage is better on this measure, meaning that a high percentage of children were discharged from foster care within one year of entry.

Permanency Indicator 2 (P2): Permanency in 12 months for children in care 12-23 months: Of all children in foster care on the first day of a 12 month period, who had been in foster care (in that episode) between 12-23 months, what percent discharged to permanency within 12 months of that first day? This is based on children who were in foster care for 12 to 23 months on a given date (denominator) and were discharged to permanency (numerator). A higher percentage is better on this measure, meaning that a high percentage of children who had been in care for one to two years were discharged to a permanency placement within the year.

Permanency Indicator 3 (P3): Permanency in 12 months for children in care 24 months or more: Of all children in foster care on the first day of a 12 month period, who had been in foster care (in that episode) for at least 24 months, what percent discharged to permanency within 12 months of that first day? This is based on children that were in care for 24 months or longer on a given date (denominator) and were discharged to permanency (numerator). A higher percentage is better on this measure, meaning that a high percentage of children who had been in care for at least two years were discharged to a permanency placement within the year.

Permanency Indicator 4 (P4): Re-entry to foster care in 12 months: Of all children who enter foster care in a 12 month period who were discharged within 12 months to reunification, relative or guardianship, what percent re-enter foster care within 12 months of that discharge? This is based on children that entered foster care within a one year period (denominator) and who re-entered in the following 12 months (numerator). The children counted in this indicator are those in Permanency Indicator 1 who returned to care within the 12 months period. If a county had no children in Permanency Indicator 1, this measure will appear in the tables as N/A; if no children were discharged, no children can re-enter care. For this measure, a lower percentage is better, meaning that few children who were discharged came back into care in a 12 month period.

SAFETY INDICATORS

Safety Indicator 1 (S1): Maltreatment in Foster Care: Of all children in foster care in a 12 month period, what is the rate of victimization per day of foster care? The denominator of this measure is of all children who are in care during a 12-month period, the total number of days these children were in foster care as of the end of the 12-month period. The numerator is, of the children in the denominator, the total number of indicated reports of maltreatment (regardless of perpetrator type) during the 12-month period. This measure is thus a rate, calculated per day of foster care. For the ease of understandability, the rate is multiplied by 100,000. A lower rate is better for this measure.

¹ Permanency includes discharges from foster care to reunification with the child's parents or primary caregivers, living with a relative, guardianship, or adoption.

For this measure, the date of maltreatment is the *incident date* as recorded in CONNECTIONS. Because incident date is rarely recorded in CONNECTIONS, the Children’s Bureau programming is set up so that the report date is used in place of incident date when an incident date is not present.

Safety Indicator 2 (S2): Recurrence of Maltreatment: Of all children who were victims of an indicated report of maltreatment during a 12-month period, what percent were victims of another indicated maltreatment report within 12 months of the initial report? This measure is based on the number of children with at least one indicated report of maltreatment in a 12-month period (denominator) who had another indicated report of maltreatment within 12 months of the initial report (numerator). A lower percentage is better for this measure.

For this measure, the date of maltreatment is the *report date* as recorded in CONNECTIONS.

CFSR Measure	Wave 1 (FFY 2013)	Wave 2 (FFY 2014)
P1: Permanency in 12 months for children entering foster care	Children entering care between 4/1/11 and 3/31/12; Permanency within one year of entry, up to 3/31/13	Children entering care between 4/1/12 and 3/31/13; Permanency within one year of entry, up to 3/31/14
P2: Permanency in 12 months for all children in care 12-23 months	Children in care 12-23 months as of 4/1/13	Children in care 12-23 months as of 4/1/14
P3: Permanency in 12 months for all children in care 24 months or longer	Children in care 24 months or longer as of 4/1/13	Children in care 24 months or longer as of 4/1/14
P4: Re-entry to Foster Care in 12 months	Children entering care between 4/1/11 and 3/31/12; Re-entry within one year of exit, up to 3/31/13	Children entering care between 4/1/12 and 3/31/13; Re-entry within one year of exit, up to 3/31/14
S1: Maltreatment in Foster Care	Children with indicated report during FFY 2013 while in care during FFY 2013	Children with indicated report during FFY 2014 while in care during FFY 2014
S2: Recurrence of Maltreatment	Children with one indicated report in FFY 2012 with another within 12 months	Children with one indicated report in FFY 2013 with another within 12 months

CFSR 3: Wave 1	Permanency Indicator 1 (P1): Permanency in 12 months for children entering foster care between 4/1/11 and 3/31/12			Permanency Indicator 2 (P2): Permanency in 12 months for children in care 12-23 months as of 4/1/13			Permanency Indicator 3 (P3): Permanency in 12 months for children in care 24 months or more as of 4/1/13			Permanency Indicator 4 (P4): Re-entry to foster care in 12 months among children who entered foster care between 4/1/11 and 3/31/12 and discharged to permanency within 12 months			Safety Indicator 1 (S1): Indicated reports while in care in FFY 2013 as per 1,000 care days of total children in foster care in FFY 2013			Safety Indicator 2 (S2): Children with at least one indicated report in FFY 2012 with another indicated report within 12 months of the initial report
